

Bloomfield School District

COVID19 Student Surveillance Testing

The New Mexico Public Education Department (NMPED) is now requiring all public and charter schools to have COVID19 surveillance testing options available to all students and student-athletes. The goal of student surveillance is 1% of the student population and 10% of athletes. While student testing is **not required** at this time, it is strongly recommended. We are encouraging our students to opt-in for COVID19 testing as requested by NMPED.

Students, with parent/guardian permission, may sign up to participate in testing through **Curative** at <https://curative.com/> or by calling 888-702-9042. Curative offers a COVID19 PCR Test which is a self-collected oral swab at McGee Park in Farmington NM. Results are obtained within 24-48 hours from Curative and will be sent to the student as well as the New Mexico Department of Health.

I grant permission for my student to participate in COVID19 Surveillance Testing. I will register my student with Curative and inform my student's school administrator of positive testing results.

I choose not to participate in COVID19 Surveillance Testing at this time.
